## CATALOGO 2017 THE MAKING OF

Viene stampato in più di 10.000 copie,  
in 4 lingue.

Iniziamo a lavorare sul nuovo catalogo  
quasi un anno prima della sua  
pubblicazione.

Quest'anno abbiamo scattato le  
fotografie nei bellissimi dintorni del  
lago di Garda e di Verona.

## CATALOGUE 2017 THE MAKING OF

Printed in over 10.000 copies, in 4

## ① Original Löwe - Qualität Made in Germany

L'azienda F.lli Schröder Srl, è l'ideatrice della forbice a battente. Sviluppa e produce forbici sotto il marchio ORIGINAL LÖWE in Germania già dal lontano 1923, ed è diventata leader del mercato in questo settore. Le forbici vengono apprezzate dai professionisti di tutto il mondo. Lo speciale acciaio usato nella produzione e la loro lavorazione con trattamento termico, rende le lame Löwe quasi indistruttibili, anche a temperature gelide.

## ② Original LÖWE - Calidad Made in Germany

Los hermanos Schröder GmbH son los inventores de las tijeras de Yunque y son en este sector hoy en día el líder en el mercado. Desde el año 1923 dichas tijeras se fabrican bajo la marca ORIGINAL LÖWE en Alemania y son apreciadas en todo el mundo por los profesionales. Las hojas son compuestas de un acero fundido y son casi infrangibles hasta en temperaturas bajo cero gracias a un tratamiento térmico especial.

## ③ Original LÖWE - Qualität Made in Germany

Die Gebr. Schröder GmbH ist Erfinder der Amboss-Schere und gilt heute auf diesem Sektor als Weltmarktführer. Bereits seit 1923 werden diese Scheren unter der Marke ORIGINAL LÖWE in Deutschland entwickelt, produziert und weltweit von Profis geschätzt. Die Klingen bestehen aus einem exklusiv für die ORIGINAL LÖWE Scheren erschmolzenen Stahl und sind durch eine perfekt abgestimmte Wärmebehandlung nahezu unzerbrechlich - auch bei Frost.

## ④ Original LÖWE - Quality Made in Germany

The Schroder GmbH brothers are the inventors of the "anvil shears", and are now the leader in the market. Since 1923, these shears have been manufactured under the ORIGINAL LÖWE brand in Germany and are appreciated by professionals all over the world. The blades are made of cast iron steel exclusively for ORIGINAL LÖWE shears and are virtually unbreakable, even in subzero temperatures, thanks to a special heat treatment.

**① Nuovo sistema di rivestimento Original LÖWE per lama e telaio**

Le forbici LÖWE da potatura sono usate principalmente all'aperto, dove spesso devono affrontare un alto livello di umidità e quindi le superfici di acciaio possono corrodersi. Grazie al nuovo rivestimento di alta qualità, spesso solo 0,01 mm, tutte le parti in acciaio sono perfettamente protette dalla corrosione, senza cambiamenti nelle caratteristiche dell'acciaio stesso. Le particelle di metallo aggiunte al rivestimento creano un prezioso effetto sabbioso. Inoltre, il rivestimento più scuro delle lame contiene particelle antiaderenti che facilitano il taglio e la pulizia delle lame.

**② Nuevo sistema de revestimiento Original LÖWE para la hoja y la estructura**

Las tijeras de poda LÖWE se utilizan principalmente al aire libre, donde encuentran un alto nivel de humedad y las superficies de acero pueden corroer. Gracias al acabado de alta calidad, el revestimiento de solo 0,01 mm de espesor, protege las partes de acero contra la corrosión, sin necesidad de algún cambio en el acero mismo. Las partículas de metal añadidas al revestimiento crean un efecto de acero arenado. Además, el recubrimiento más oscuro de las cuchillas contiene partículas antiadherentes, que facilitan el corte y la limpieza de las cuchillas.

**③ Das neue Original LÖWE Beschichtungssystem für Klinge und Scherenkörper**

Da es sich bei den LÖWE Scheren vorwiegend um Scheren für den Wein-, Obst- und Gartenbau handelt, werden diese überwiegend im Freien benutzt. Hier sind die Werkzeuge häufig hoher Feuchtigkeit ausgesetzt, sodass blanken Stahloberflächen unansehnlich korrodieren können. Dank der neuen hochwertigen Beschichtung sind ab sofort alle Stahlteile optimal korrosionsgeschützt, ohne die Eigenschaften des Stahls zu verändern. Die der Beschichtung beigefügten Metallpartikel erzeugen eine wertige Sandstrahl-Optik. Zusätzlich enthält die bewusst etwas dunkler gewählte Beschichtung der Klingen Antihaftpartikel, die das Schneiden und das Reinigen der Klingen nochmals erleichtert. Durch die hochwertige, nur 0,01 mm starke Beschichtung der zuvor blanken Stahlteile haben wir die Qualität unserer Scheren noch weiter verbessert.

**④ New Original LÖWE coating system for blade and body**

Since the majority of LÖWE products are pruning shears for viticulture, horticulture and fruit growing, these are mainly used outdoors. Here the tools often have to face high humidity, so that bare steel surfaces can corrode unsightly. Thanks to the new high-quality coating all steel parts are optimally protected against corrosion, without changing the features of the steel. The metal particles added to the coating create valuable optics like sandblasted steel. In addition, the consciously chosen darker coating of the blades contains non-stick particles, which facilitate the cutting performance and the cleaning of the blades. By the high-end, only 0.01 mm thick coating of the previously bare steel parts, the quality of the pruning shears has been further improved.

**① Rivestimento grigio scuro**

Caratteristiche: protezione dalla corrosione, antiaderente. Usato su tutte le lame LÖWE ad eccezione della LÖWE 11,12.

**② Revestimiento gris marengo**

Características: protección de la corrosión, antiadherente. Uso en todas las cuchillas LÖWE a excepción de LÖWE 11,12.

**③ Dunkelgraue Beschichtung**

Funktion: Rostschutz, Antihaft. Wird bei allen LÖWE-Klingen angewendet, mit Ausnahme LÖWE 11,12.

**④ Dark grey coating**

Features: corrosion protection, non-stick. Used on all LÖWE blades except from LÖWE 11,12.

- ① Tutti i pezzi sono facilmente sostituibili.
- ⑤ Todas las piezas son fácilmente sustituibles.
- ① Alle Teile sind leicht auswechselbar.
- ⑥ All parts are easily replaceable.

① I nuovi troncarami uniscono i vantaggi delle forbici con taglio a battente con quelli a taglio Bypass:

**taglio a battente**

- tagli precisi con poco sforzo
- capace di tagliare rami duri

**geometria bypass**

- adatta per raggiungere rami meno accessibili
- taglia e trattiene il pezzo tagliato
- lama corta che rende il punto di taglio più vicino al perno

**Capacità di apertura fino ad un massimo di 90°**

⑤ Los nuevos corta-ramas ofrecen las ventajas tanto de las tijeras de yunque como de las tijeras Bypass:

**Corte de yunque**

- corte preciso con poco esfuerzo
- capaz de cortar ramas duras

**Geometría Bypass**

- apta para alcanzar ramas menos accesibles
- corta y retiene la pieza cortada
- gracias a la hoja corta hace que el punto de corte sea más cerca al bulón

**Capacidad de abertura hasta a un máximo de 90°**

④ Die neuen Astscheren verbinden die Vorteile von Amboss-Scheren mit denen von Bypass-Scheren:

**Amboss-Technik**

- besonders leichter Schnitt
- robuster Einsatz der Schere auch in härteren Gehölzen

**Bypass-Geometrie**

- ermöglicht Zugang zu engen Verästelungen
- Schnittgut wird optimal in der Schere gehalten
- Schneiden nah am Drehpunkt

**Öffnungswinkel der Griffrohre bis max. 90°**

⑥ The new loppers offer the advantages of both the Anvil shears and the Bypass shears.

**Anvil shears**

- precise cutting with little strength
- capable of cutting hard branches

**Bypass geometry**

- capable of reaching hard to reach branches
- cuts and retains the cut pieces
- due to the short blade, cuts closer to the central bolt

**Opening capacity up to 90°**

①

- Eccellente forbice universale.
- Maneggevole grazie agli anelli, che permettono di continuare ad impugnare la forbice anche dopo il taglio e svolgere in contemporanea altri lavori.

⑤

- Excelente tijera universal.
- Muy manejable gracias a su anillo, el cual permite mantener las tijeras empuñadas después del corte y poder realizar otros trabajos al mismo tiempo.

②

- Ausgezeichnete Universalschere.
- Handlich und praktisch: die Schere hängt an zwei Ringen während und nach dem Schnitt in der Hand. Zeitraubendes Aufheben und Weglegen ist überflüssig geworden.

③

- Excellent, All-Purpose Scissors.
- Practical household scissors that are easy to handle. The ring allows you to keep holding the scissors even after cutting, allowing you to do other work at the same time.

## I CORSI DI POTATURA

Negli ultimi anni i corsi di potatura organizzati da Stocker e Vita in Campagna godono di sempre maggiore popolarità.

L'esperto Giovanni Rigo, in circa mezza giornata, spiega ai partecipanti le tecniche basilari della potatura e della manutenzione delle piante da frutto.

Durante un fine settimana si riescono a svolgere quattro corsi con circa 200 - 250

partecipanti in totale, tutti coinvolti grazie ad una campagna pubblicitaria interamente svolta da noi (pagina pubblicitaria, dépliant, newsletter..).

Se anche voi siete interessati ad ospitare un corso di potatura con Vita in Campagna e Stocker presso il Vostro garden centre, contattateci all'indirizzo:

[marketing@stockergarden.com](mailto:marketing@stockergarden.com)

Un corso coinvolge circa 250 persone

## PRUNING COURSES

Pruning courses organized by Stocker and the Italian magazine Vita in Campagna have become increasingly popular over the last few years.

The expert Giovanni Rigo, in about a half day, explains to the participants the basic techniques of pruning and maintenance of fruit trees.

During one weekend 4 courses take place with a total of 200 - 250 participants all involved thanks to an advertising campaign carried out entirely by us.

**COMBISYSTEM**  
**COMBISYSTEM**  
**Kombisystem**  
**Combisystem**

① Combisystem è la soluzione ideale per i lavori da taglio soprattutto per siepi e alberi. Utilizzato in combinazione con il manico telescopico in alluminio, è un attrezzo adatto e non pericoloso per la cura dell'arbusto.

**Gli attrezzi compatibili con il manico sono:** lo svettatoio, il tagliaiepe, la sega e la roncola. Il comando a cavo flessibile degli svettatoi e dei tagliaiepi, rendono meno faticoso il lavoro di taglio e con meno dispendio di energie.

② Combisystem es la solución ideal para el trabajo de corte, sobre todo para setos y árboles. Utilizado en combinación con el mango telescópico de aluminio, hace de él un utensilio apropiado para el cuidado del arbusto.

**Los utensilios compatibles con el mango son:** El desmochador, el corta seto, el serrucho y el machete.

La forma de trabajo mediante cuerdas flexibles del desmochador y del corta seto, hace menos pesado el trabajo del corte y con menos gasto de energía.

③ Kombisystem ist die ideale Lösung bei Schneidearbeiten hoher Hecken und Bäume. Kombiniert mit dem Alu-Teleskop-Stiel ist eine fachgerechte und gefahrlose Baum- und Strauchpflege gewährleistet.

**Die Geräteköpfe:** die Raupenschere, die Heckenschere, die Säge und die Machete. Die Seilzugtechnik der Raupen- und Heckenschere ermöglicht ermüdungsfreies Schneiden in schwindelnder Höhe ohne jeden Kraftaufwand.

④ Combisystem is the ideal solution for cutting high trees and hedges. With the telescopic aluminum handles it is possible to practice a safe tree and hedge care. **Tools that are compatible with the handles are:** the bypass lopper, the hedge trimmers, the saw, and the machete. The bypass lopper's cable-pull technique makes cutting less strenuous.

**① Talpa-stop solare**  
Disabitante per talpe e roditori, produce vibrazioni ad intervalli di 30 secondi circa. Per superfici di ca. 500 m². Pannello solare monocristallino. Funziona senza cavo. 2 batterie ricaricabili (AA 1,2V 600mAh Ni-Mh). Lente stabilizzata UV. Ore di operatività: 72 ore, se posizionato in area soleggiata affinché il pannello solare possa caricare. Resistente alle intemperie.

**Ⓔ Topo-stop solar**  
Desahabitate para topos y roedores, produce vibraciones con un intervalo de 30 seg aproximadamente. Para superficies de 500 m². Panel solar monocristalino. Funciona sin cable. 2 pilas recargables (AA 1,2V 600mAh Ni-Mh). Lente estabilizadora UV. Horas de funcionamiento: 72 horas, si está colocado en un área soleada a fin de que el panel pueda cargarse. Resistente a la intemperie.

**① Wühlmaus-Stop**  
Erzeugt in Abständen von 30 Sekunden Vibrationen im Erdreich und vertreibt dadurch Wühl- und Feldmäuse sowie Maulwürfe. Für Flächen von ca. 500 m². Kristall-Solarpaneel. Funktioniert ohne Kabel. Aufladbarer Akku - 2 Batterien (AA 1,2V 600mAh Ni-Mh). Funktionsdauer: 72 Stunden, wenn das Solarpaneel ausreichend der Sonne ausgesetzt ist. Wetterbeständig.

**Ⓔ Solar Powered Rodent Stopper**  
Powerful vibrations are sent through the ground in order to prevent moles and field mice from nesting in the garden area. It is a flat 500 m² crystal solar panel. Works with two AA rechargeable batteries. Lasts for 72 hours with sufficient sun exposure. Durable in all weather conditions.

① Per l'applicazione su alberi (ev. anche su facciate della casa). Distanza fra le singole casette: 4-5 mt. Vantaggi: Non c'è necessità di insetticidi, i pipistrelli divorano ca. 2.000 insetti a notte. Ecologico.

⑤ Para colocar en los árboles (EV, en las fachadas de las casas). Distancia entre los nidos 4-5 mt. Ventaja: No se necesitan insecticidas, ya que los murciélagos comen 2.000 insectos por noche. Ecológico.

④ Geeignet für Anbringung an Bäumen (evtl. auch an Häuserfassaden). Distanz zwischen den einzelnen Feldermaushäusern: 4-5 m. Vorteil: Kein Bedarf von Insektenschutzmitteln, da Fledermäuse ca. 2.000 Insekten/Nacht vertilgen. Ökologisch.

⑥ Can be easily attached to a tree (or can be hung on the outside of a house). The advantage of having a bat house is that there is no need for insect repellent! Bats destroy approximately 2,000 insects a night.

A collection of mechanical parts including a large metal blade, a gear, a pulley, and various bolts and screws, arranged on a blue background. The parts are scattered across the frame, with some showing signs of wear and others appearing new. The blade is a large, curved metal piece with a hole in the center. The gear is a small, black, circular component with teeth. The pulley is a larger, black, circular component with a central hole. The bolts and screws are of various sizes and types, including hex bolts and screws. The background is a solid blue color.
